

Please reject NAB's petition 04-160. I travel quite a bit and I listen to XM Radio for weather and traffic information as well as music and talk radio. This is a valuable service to me - it keeps me informed while on the road without having to find a new radio station every couple of hours. The content is sometimes not available at all without XM Radio. I pay for this service and do not wish to lose it.
Please continue to give us options on types of programming.
